

SPEED-0

This environmentally friendly model boasts a range of ergonomic features, including a synchronized automatic weight feature and an individual look, and can be assembled quickly with minimal tools upon delivery at the intended place of use. The materials used are easy to sort for recycling and are 99% recyclable. There is also an eye catching plastic shell that can be combined with different mesh colors.

SEAT DEPTH

The adjustable seat depth can adapt to the user enabling them to achieve optimum support for their thighs.

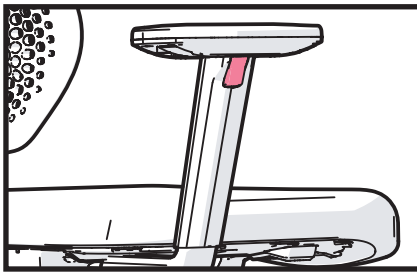

SYNCRO RELAX AUTOMATIC (BACKREST CP LEVER)

The backrest counter-pressure automatically adjusts to the body weight in any seating position. The backrest tilt angle can be locked in the forward-most position, with a seat depth adjustment and a standard integrated seat tilt for utmost comfort.

SEAT HEIGHT

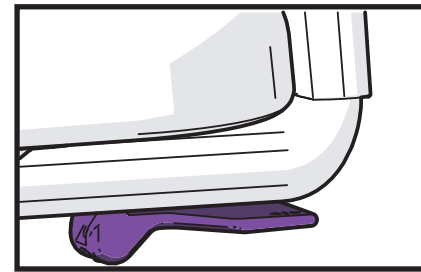

In order to achieve a great posture, the adjustable seat height can adapt to the user.

For optimal posture, the thigh and lower leg should form an angle of at least 90°

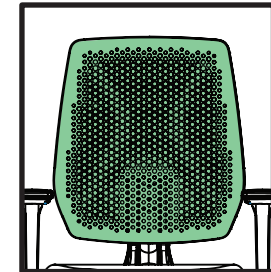

ADJUSTABLE ARMS (HEIGHT)

The arms are height adjustable up to 4 in. With the easy button release and lock system, the user is able to set the arms to their preferred height. The armrests are at the correct height when the elbows are resting on the arms and the shoulder and neck muscles are relaxed.

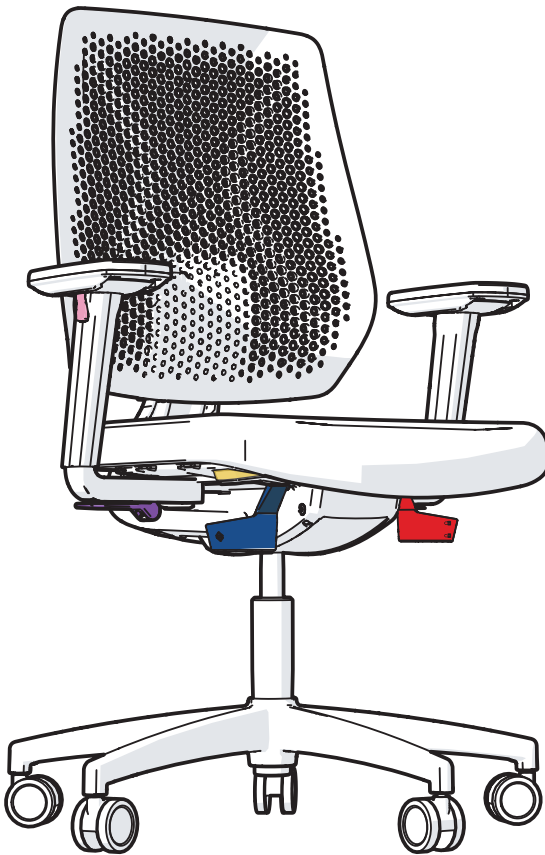

ADJUSTABLE ARMS (DEPTH)

The arm depth lever is ergonomically positioned beneath the arm enabling the user to extend the arm to the desired angle and depth.

ADJUSTABLE BACKREST

The vertical position of its lumbar curve on the backrest can be positioned to fit the small of your back. This adjustment enables you to achieve optimum back posture and support.
